COURSES DESCRIPTION

Study of courses is carried out as part of higher education programme:

Language and Culture: Theory and Practice (in English)

in the Field of Studies:

45.04.01 Philology

Course title	Philology in the System of Modern Humanities
Workload, credits/ hours	4/144
	Course contents
Course Module Title	Brief Description of the Module Content
Unit 1. Philology and	Interdisciplinarity as an essential feature of modern
Humanities. The status of	humanities. Text as the basis of humanities.
philology in the modern world.	Object and subject of philology as a science.
Language as an art	The place and status of philology in modern science.
	Considering the definitions of philology and linguistics.
Unit 2. Language, culture, history	A brief excursion into the history of the formation of humanities and philology. Interaction of language and culture. Herder's hominid triad and its influence on the philological evolutionary paradigm.
	Philological hermeneutics. Philological reconstruction.
Unit 3. Text studies and	Oppositional and component analyses.
methods to analyze texts. Main	Text as a communicative event: interaction of an author and a
language functions	reader; their communicative roles and text interpretation.
	The role of an author and its textual functions.
	Expansion of research problems in philology.
Unit 4. Modern philology as a	Linguistic branches of language learning.
complex of linguistic disciplines	Anthropocentrism as a basic feature of modern linguistics.
that study language and texts	New directions in modern linguistics:
	Linguo-semiotics, Sociolinguistics, Discourse analysis,
	Cognitive linguistics.
	Online social networking tools for the representation of
Unit 5. An overview of online	current philological research.
resources with the latest	The most popular social networking platforms for scholars
research in philology and the	working in the humanities (using ResearchGate as an
humanities	example).
	The best digital libraries for philologists.

Course title	Information technologies	
Workload, credits/ hours	2/72	
Course contents		
Course Module Title	Brief Description of the Module Content	
	The purpose, objectives, place and content of the discipline.	
	Computer science and new information technologies.	
Unit 1. Computer, office and	Technical and software of modern PCs.	
Internet technologies.	Office software packages.	
Internet technologies.	Internet - architecture and new technologies.	
	Web sites and web programming.	
	Information security.	
	Electronic and distance learning.	
	Educational portals and Internet universities.	
	Internet resources and copyright in the Internet.	
Unit 2. Computer technologies in	The system of electronic libraries.	
education and research.	Computer testing in the assessment of student academic	
	achievement.	
	Development of computer tests and assessment of their quality	
	(for example, the system TRFL).	
	Computational linguistics.	
Unit 3. Computer technologies in philology.	Corpus linguistics and diachronic studies.	
	Search for information and electronic libraries.	
	Machine translation of information.	
	Computer textology and computer lexicography.	
	Quantitative linguistics.	
	Computer technology in data analysis.	
	Computer technology in text analysis.	

Course title	Foreign Language (Russian as a Foreign Language)
Workload, credits/ hours	6/216
	Course contents
Course Module Title	Brief Description of the Module Content
Unit 1. Philology and Humanities. The status of philology in the modern world. Language as an art	Theme 1. Interdisciplinarity as an essential feature of modern humanities. Text as the basis of humanities. Object and subject of philology as a science. The place and status of philology in modern science. Considering the definitions of philology and linguistics.
Unit 2. Language, culture and history	Theme 2. A brief excursion into the history of the formation of humanities and philology. Interaction of language and culture. Herder's hominid triad and its influence on the philological evolutionary paradigm.
Unit 3. Text studies and methods to analyze texts. Main language functions	Theme 3. Philological hermeneutics. Philological reconstruction. Oppositional and component analyses. Text as a communicative event: interaction of an author and a reader; their communicative roles and text interpretation. The role of an author and its textual functions.
Unit 4. Modern philology as a complex of linguistic disciplines that study language and texts.	Theme 4. Expansion of research problems in philology. Linguistic branches of language learning. Anthropocentrism as a basic feature of modern linguistics. New directions in modern linguistics: Linguo-semiotics, Sociolinguistics, Discourse analysis, Cognitive linguistics. Theme 5. Linguo-semiotics. Pierce's definition of sign. Peirce's icon/index/symbol triad. The levels of semiotic description, aspects, or sections of semiotics (according to Charles William Morris): semantics, pragmatics, syntax. Theme 6. Sociolinguistics as the study of society and language. The conditions in which the language is functioning. Types of sociolinguistics. Variation on different levels of language system. Types of variation: temporal, regional, social, personal. Theme 7. Discourse Analysis. The objects of discourse analysis. Context and pragmatics. Different Views of Discourse Analysis. Difference between spoken and written language. Critical discourse analysis. Theme 5. Cognitive linguistics. The cognitive (conceptual) picture of the world. The concept as a basic term of cognitive linguistics. Types of concepts and their verbalization. Several approaches to the concept understanding. The concept as a cultural phenomenon. The concept as linguistic-cognitive phenomenon.
Unit 5. An Overview of online resources with the latest research in philology and the humanities	Theme 8. Online social networking tools for the representation of current philological research. The most popular social networking platforms for scholars working in the humanities (using Academia.edu. ResearchGate as an example). The best digital libraries for philologists.

Course title	Academic English
Workload, credits/ hours	3/108
Course contents	
Course Module Title	Brief Description of the Module Content
	Academic style and vocabulary,
	Academic skills. Time Management and study
Unit 1. Academic skills	Environment.
	Reading strategies.
development.	Listening and note-taking.
	Useful collocations (nouns and ajectives).
	Useful collocations (verbs) and fixed expressions.
	Cause and effect.
	Data analysis and research methods.
Unit 2. Ways to present results of your research.	Graphs and diagrams in your research papers.
	How to avoid plagiarism.
	Text structure and organization.
	How to present aims and results of your study.
	(presentations, reports, articles).

Course title	Scientific English	
Workload, credits/ hours	3/108	
	Course contents	
Course Module Title	Brief Description of the Module Content	
Unit 1. Research skills development.	Scientific style and it's features	
	Scientific vocabulary	
	Scientific texts: reading strategies.	
	Useful collocations (nouns and ajectives).	
	Useful collocations (verbs) and fixed expressions.	
	Scientific text structure and organization.	
Unit 2. Ways to present results of your research.	Research hypothesis statement. Describing the	
	research methodology	
	Presenting data (graphs and diagrams)	
	Plagiarism. Quotations. references	
	Presenting results of the research	

Course title	Theory and History of Linguistics
Workload, credits/ hours	5/180
	Course contents
Course Module Title	Brief Description of the Module Content
Topics and sections	Annotated content topics
Unit 1. Evolution of knowledge on the object of linguistics. Three paradigms of theory of linguistics. Classical Antiquity	Language as the main object interacting with thought (mind), reality and as a distinctive feature of a man. The ideas of using language and explaining the world with its help through philosophy and logic. Plato (427 – 347 B.C.); Aristotle (384 – 322 B.C.); the Stoics (3rd century B.C.)
Unit 2. Logic and grammar. English empiricism and French rationalism.	Universal Grammars. Integral and subsumption relations and their part in linguistic description
Unit 3. Evolutionary approach to Language studies	The principle of historicism in natural sciences and humanities. The principle of reconstruction. New methods of the research in the late 18 th century.
Unit 4. Investigation of the inner structure of languages: new explanation of the origins and genealogy of languages. Comparative approach	Theories of the founders of comparative and historical method. J. Grimm, Fr. Bopp, R. Rask, A. Schlegel
Unit 5. The linguophilosophical theory of W. von Humboldt	Main objects of language studies; main antinomies: thought and reality, man and the universe, dynamics and statics. Language as a national spirit. Language as an organ that forms a thought
Unit 6. Psychological method and terms in language studies. Neo-grammarian theory of language	Main contributions of the Neo-grammarians to general linguistics: notion of idiolect, autonomy of the sound level, historicism and analogy.
Unit 7. Systemic approach in Linguistics	Systemic approach to treat language and language phenomenon. Jan Baudouin de Courtenay, Ferdinand de Saussure and their contribution to the theory of Linguistics.
Unit 8. Positivism and Neopositivism. Phenomenology and linguistics	Main conceptions of European philosophy (K. Popper, C. Levy-Strauss, J. Derrida, etc.) Evolution of approaches and methods to analyze language: from E. Husserl to L. Wittgenstein
Unit 9. Modern theories of Language and Linguistics	Embodied language processing; Emergentist approaches to language; Sociocultural theories of language; Usage-based linguistics

Course title	General Linguistics
Workload, credits/ hours	5/180
	Course contents
Course Module Title	Brief Description of the Module Content
Unit 1. Language as a research	Theories of language studies. Language as a research object to
object to observe and the object	observe and the object of linguistics. Linguistic disciplines and
of linguistics.	their objectives.
Unit 2. Language variations	Language and Dialects. Study of Russian Dialects. Slang, Jargon and Accent.
Unit 3. Language and Brain	Study of brain anatomy; parts of the brain and language functions (lexical or grammatical abilities). Psycholinguistic studies of how language is used as we speak and understand or acquire the language.
Unit 4. The ontology of language	Language as a complex form, as a synthesis of external and internal forms. Multiplicity of a language form. Outer and inner forms of language.
Unit 5. Language system and structure.	System and structure of language. Their constituents and specifics. Abstract and concrete units of language. General classification of language units as the structural background of its level organization. Hierarchies and classifications of abstract language units. Understanding language structure as a cohesion of syntagmatics and paradigmatics.
Unit 6. General Phonetics and Phonology	Articulatory phonetics: The tools of phonetics, The vocal tract, Articulation, Manners of articulation, Consonants, Vowels, Suprasegmentals, Length, Tone and intonation, Syllable structure, Stress Acoustic phonetics: Sound waves, Simple and complex sounds, Hearing, Measuring speech Phonology: Phonemes and allophones, Phonotactics, Alternation and allomorphs, Types of phonological alternations
Unit 7. General Morphology	A word as an abstract sign and a smallest grammatically independent unit of language. Morphemic structure, morphological processes of modifying the form and meaning of lexemes, Derivation
Unit 8. Syntactic structures	The structure of sentences, the concept "poverty of the stimulus" the notions "language organ" and "Universal Grammar". Subtle restrictions that limit the ways in which sentences can be constructed and interpreted. Differences in sentence structure in languages from around the world
Unit 9. Language changes	Language changes: sound changes, changes in morphology and syntax, change of words meanings. Reasons for changes in languages.

Course title	Theory of Intercultural Communication
Workload, credits/ hours	5/180
	Course contents
Course Module Title	Brief Description of the Module Content
Unit 1. Intercultural interaction and problems of understanding	Culture specific peculiarities of behavior. Barriers to intercultural communication. Language barrier. Culture barrier. Ethnocentrism. Ethno stereotypes and prejudice. Communicative expectations. Communicative failures and their typology. Adjustment to new culture. Culture shock. Communicative shock. Strategies of culture shock. Strategies to help overcome culture shock.
Unit 2. Communication as an element of culture	Types of communication. Verbal communication. Nonverbal communication. Paraverbal communication. Emotional communication. Model of verbal communication. Components of communication. Encoding. Decoding. Context. Types of context. Culture as a context for communication. Definitions of culture. Surface culture. Deep culture. Elements of deep culture (social organization, social roles, worldview, cultural values).
Unit 3. How cultures differ. Typology of cultures	G. Hofstede's dimensions of culture. Individualism vs. Collectivism. Power distance. Uncertainty avoidance. Masculinity vs. Femininity. E. Hall's dimensions of culture. Distance (High-contact vs. Low-contact cultures). Time (Monochronic vs. Polychronic cultures). Context (High-context vs. Low-context cultures). Cluckhohn and Strodtbeck's Value orientation theory. Mannature orientation. Human nature orientation. Activity orientation. Time orientation. Relational orientation.
Unit 4. Language, culture and cognition	Language identity. Cultural identity. Communicative identity. Communicative values in language and communication. Distance vs. Contact. Status vs. Equality. Positive thinking vs. 'Negative 'thinking (optimism vs. pessimism). Dominant values of Anglo-Saxon culture. Dominant values if Russian culture. Dominant values of Eastern cultures: Chinese, Korean, Arabic etc.
Unit 5. Emotions in different cultures	Universality and cultural specificity of emotions. Emotional self-control and free display of emotions. Emotions in Korean vs. Anglo-Australian cultures. Emotions in Chinese culture. Emotions in British and American Cultures. The smile and its meaning in America and Russia. Emotions communication vs. emotive communication and their functions.
Unit 6. Politeness / impoliteness in intercultural perspective	Characterising polite behavior. Universality and cultural specificity of politeness / impoliteness. The terms 'polite' and 'politeness' in different languages. Types of politeness. Strategies of politeness. Politeness across cultures: English politeness, Russian politeness, Korean politeness, Arabic politeness etc.
Unit 7. Culture and communicative styles	Communicative culture. Communicative style. Dimensions of communicative style. Dominant characteristics of English communicative style. Dominant characteristics of Russian communicative style. Impact of culture on communicative styles. Interdependence between culture, cognition and communication.

Course title	Theory of Intercultural Communication
Workload, credits/ hours	5/180
Course contents	
Course Module Title	Brief Description of the Module Content
Unit 8. Intercultural communicative competence	Notion of competence. Definition of intercultural communication competence and id its structure. Language competence. Communicative competence. Sociocultural competence. Cultural literacy. Cultural awareness. Psychological competence. Psychological adjustment. Empathy. Tolerance.

Course title	Planning a Research Project
Workload, credits/ hours	3/108
	Course contents
Course Module Title	Brief Description of the Module Content
Unit 1. Scientific research	What is research? Data, information and research findings. Problem defining. Hypothesis setting. Collecting data. Hypothesis testing.
Unit 2. Research data	Types of research data. Primary and secondary data. Ways of collecting data. Data for language research.
Unit 3. Research Questions	Research questions, topics and puzzles. Implications of research questions for data, data collection and analysis. Types of research questions.
Unit 4. Quantitative and qualitative methods	Combination or integration of quantitative and qualitative methods in linguistic research. triangulation and mixed methods: the benefits and challenges of combining paradigms.
Unit 5. Quantitative methods: Concepts, Frameworks and Issues	Forming a hypothesis, and considering the quantifiability, reliability, and validity of data – and the most frequently used quantitative designs in linguistics. Use of questionnaires in quantitative research, phrasing and coding questionnaires.
Unit 6. Organizing and Processing Data	Constructing and testing hypotheses; statistical tests used in linguistics: chi-square tests and t-tests; interpretation of quantitative results; combining quantitative and qualitative methods in linguistic research.
Unit 7. Corpus Research Methods	Theoretical principles surrounding corpus linguistics techniques, building and annotating a corpus, different types of corpora, and different kinds of research questions; corpus analysis.
Unit 8. Qualitative Research Methods	Qualitative Research Methods: general approaches and some specific data creation methods. Relationship between the micro and macro levels of linguistic inquiry

Course title	Multimodal Communication	
Workload, credits/ hours	5/180	
	Course contents	
Course Module Title	Brief Description of the Module Content	
Unit 1. Basics of semiotics	Semiotic world view and its reflection in language. Semiology. Semiosis. Symbol as a sign.	
Unit 2. Language as a sign system	Features and principles of linguistic sign. Signified and signifier / Signatum and signum. Types of linguistic signs: icons, indexes, symbols. Hierarchy of linguistic signs.	
Unit 3. Communicative situation and communicative act and their semiotic functions.	Functions of language as a sign system: K. Bühler and R. Jakobson theories.	
Unit 4. Multimodal communication	Combining visual and audial information. Genres of multimodal communication.	
Unit 5. Image-centricity in contemporary multimodal practices	Image-centricity, intertextuality. Relative status of image and language.	
Unit 6. Cognitive semantics	Basis of semantics in conceptualization. Imagery from the metaphoric source domain	
Unit 7. Semantics as a study of	The Meaning of Meaning Model.	
meaning	Semantic network.	

Course title	English Literature: cultural and historical approach
Workload, credits/ hours	5/180
Course contents	
Course Module Title	Brief Description of the Module Content
	1. The earliest history of the British Isles and the English
Unit 1. Early Medieval	language.
Literature	2. Early Medieval Literature.
	3. The poem "Beowulf"
	4. Courtly literature and chivalric tradition.
Unit 2. Middle English literature.	5. Late Middle English literature.
	6. English literature after Chaucer.
	7. Tudor England.
	8. English Renaissance theatre
Unit 3. Literature of the English Renaissance	9. Shakespeare as a phenomenon
	10. Shakespearean sonnet.
	11. Shakespeare's drama
	12. English theatre after Shakespeare

Course Module Title Brief Description of the Module Content Main definitions and terms. Oral, written and electronic literature. Literary and non-literary facts. Oral, written and electronic literature. Literary and non-literary facts. Oral, written and electronic literature. Literary and non-literary facts. Oral, written and electronic literature. Literary and non-literary facts. Oral, written and electronic literature. Literary and non-literary facts. Oral, written and electronic literature. Literary facts. Course title	Comparative and Typological Linguistics
Workload, credits/ hours	5/180
Course contents	
Course Module Title	Brief Description of the Module Content
Unit 1. Basic concepts of comparative and typological linguistics	The subject and tasks of comparative and typological linguistics. Differences of comparative-historical and comparative-typological methods in linguistics. General morphology: grammatical meanings, forms and categories
Unit 2. Morphological classification of languages and typology of language levels	History and modern principles of typological classification. Inflectional, agglutinative, isolating and incorporating languages. Comparative and typological studies in phonetics, syntax, and lexicology.
Unit 3. Contrastive Grammar	Matching criteria. Word and morpheme as objects of typology. Typological features of English and Russian
Unit 4. Typology of grammar categories	Morphological universals. Syntax and morphological categories. Inflective and derivational categories. Semantic and syntactic categories.

Course title	Discourse Analysis
Workload, credits/ hours	5/180
	Course contents
Course Module Title	Brief Description of the Module Content
Unit 1. Introduction to discourse analysis	Defining text and discourse. Defining Text Linguistics and Discourse Analysis. The scope of discourse analysis. Approaches to the phenomenon of discourse. Main concepts and methods. Data collection. Modern challenges for discourse theories.
Unit 2. Transdisciplinary approach to discourse analysis. Main schools and central topics.	Discourse analysis and other disciplines. Discourse analysis and pragmatics. Speech act theory and the theory of implicature in the analysis of discourse. Conversational Analysis, main concepts and methods. Psycholinguistics. Emotion in Discourse.
Unit 3. Discourse strategies and practices in various sociocultural contexts	Interactional sociolinguistic approach to discourse analysis. Theories of politeness and impoliteness. Anthropological approach to discourse analysis. Cultural values and discourse strategies. Stylistics characteristics of discourse. Sample analysis.
Unit 4. Critical Discourse Analysis	The scope of Critical Discourse Analysis. Discourse and power. Ideology, social cognition and discourse. Ideological analysis. Discourse and manipulation. Multimodal strategies. Critical analysis of media discourse. Critical analysis of political discourse. Sample analysis.
Unit 5. Emotions in different cultures	Universality and cultural specificity of emotions. Emotional self-control and free display of emotions. Emotions in Korean vs. Anglo-Australian cultures. Emotions in Chinese culture. Emotions in British and American Cultures. The smile and its meaning in America and Russia. Emotions communication vs. emotive communication and their functions.
Unit 6. Politeness / impoliteness in intercultural perspective	Characterising polite behavior. Universality and cultural specificity of politeness / impoliteness. The terms 'polite' and 'politeness' in different languages. Types of politeness. Strategies of politeness. Politeness across cultures: English politeness, Russian politeness, Korean politeness, Arabic politeness etc.
Unit 7. Culture and communicative styles	Communicative culture. Communicative style. Dimensions of communicative style. Dominant characteristics of English communicative style. Dominant characteristics of Russian communicative style. Impact of culture on communicative styles. Interdependence between culture, cognition and communication.
Unit 8. Intercultural communicative competence	Notion of competence. Definition of intercultural communication competence and id its structure. Language competence. Communicative competence. Sociocultural competence. Cultural literacy. Cultural awareness. Psychological competence. Psychological adjustment. Empathy. Tolerance.

Course title	Linguistic Pragmatics
Workload, credits/ hours	3/108
	Course contents
Course Module Title	Brief Description of the Module Content
	Ambiguity of language.
	Semantic meaning and pragmatic meaning.
	Language and context.
Unit 1. Pragmatics:	Types of context.
definition and scope.	Pragmatics and culture.
	Pragmatic competence.
	Pragmatic failure.
	Cross-cultural pragmatic failure.
	Pragmatics and other disciplines:
Unit 2. Transdisciplinary	Pragmatics and philosophy.
approach to pragmatic.	Pragmatics and psychology.
Main schools and central	Pragmatics and ethology.
topics.	Pragmatics and ethnology.
	Pragmatics and sociology.
	Pragmatics and political sciences.
	Different cultures, different languages, different
	speech acts.
Unit 3. Cross-cultural	Cross-cultural pragmatic and different cultural
Pragmatics.	values.
_	Speech acts and speech genres across languages and
	cultures.

Course title	Theory of Politeness
Workload, credits/ hours	3/108
	Course contents
Course Module Title	Brief Description of the Module Content
	Politeness as social practice. Politeness as a pragmatic
	category.
Unit 1. Politeness theory	First-order politeness.
	Second-order politeness.
	Approaches to the phenomenon of politeness
	G. Leech's approach to politeness.
Unit 2. The conversational-	Politeness Principle and its maxims: tact, generosity,
maxim view	approbation, modesty, agreement, sympathy maxims.
	Robin Lakoff's approach to politeness.
	P. Brown and S. Levinson's Theory of Politeness.
Unit 3. The face-saving view	Negative Politeness.
_	Positive Politeness.
	Criticism of P. Brown and S. Levinson's model of
	politeness.
Unit 4. Discursive approach	Polite bahaviour and politeness in discourse.
to politeness	Politeness and interpersonal evaluation.
	Politeness and context.
	Politeness as relation al work.
Unit 5. Politeness and	Understanding of politeness in different cultures.
	Strategies of Positive and Negative politeness in different
impoliteness across cultures	cultures.

Course title	Methods of Linguistic Analysis
Workload, credits/ hours	3/108
	Course contents
Course Module Title	Brief Description of the Module Content
	Concepts of «methodology», «method», «methodics»,
	«techniques». General methodology of science. Theory of
	method.
	Method of linguistic research. Ties of scientific method and a
Unit 1. Main ideas of method	line of linguistic research.
theory in linguistics	System of scientific procedures. Techniques and procedures.
	Research ideas.
	Combining methods in modern linguistics. Quantitative and
	qualitative methods.
	Contemplating Interviews and Focus Groups
	Quantitative methods: Concepts, Frameworks and Issues
	Corpus Research Methods in Linguistics
	Descriptive method. Observation, generalization,
Unit 2. Concrete scientific	interpretation and classification. Descriptive method as one of
research methods and their	the main techniques of semantic analysis.
structure	Comparative method. Comparative and contrastive methods.
	Discourse-Analytic Approaches to Text and Talk
	Narrative Analysis in Linguistic Research
	Multimodal Analysis: key issues

Course title	Sourcing and Referencing
Workload, credits/ hours	3/108
	Course contents
Course Module Title	Brief Description of the Module Content
	Types of sources: primary and secondary data sources, databases. Citations, abstracts, full text articles and statistical data.
Unit 1. Sources	Searching sources. Searching more than one database at a time as a time-saving strategy. Creating a list of databases to search
	Targeting searches. Strategies for methodical and efficient searching. Citation chaining. Citation indexes
	Academic integrity and plagiarism. Plagiarism prevention. Work with the program antiplagiat.ru
	Evaluating resources. Relevance, currency and credibility of resources
Unit 2. Work with sourses	Organizing resources. Referencing programs, providing hyperlinks to electronic files including images as efficient paper-free storage facilities. Notes and comments a a basis of a future literature review. Constructing tables of resources
Unit 3. Referencing	Bibliographies and reference lists. Major referencing systems. Vancouver of numerical system, the Harvard and APA system. Russian standards of referencing. Referencing problems (subtitles, dates, publishers, authors). Ejournal references, web references. Quotations. Paraphrasing. Describing the method. Avoiding over-referencing

Course title	Contrastive Linguistics
Workload, credits/ hours	4/144
	Course contents
Course Module Title	Brief Description of the Module Content
Unit 1. Morphological classification of languages and contrastive grammar	History and modern principles of typological classification. Contrastive studies of different language types.
Unit 2. Contrastive Syntax	Matching criteria. Syntax universals. Word order contrasts. Types of sentences sets. Structural differences. Communicative structure of utterance.
Unit 3. Contrastive Semantics	Semantic universals. Derivational differences. Compound words. Inner form. Semantic comparison methods. Semantic fields.

Course title	Comparative and Historical Linguistics
Workload, credits/ hours	4/144
	Course contents
Course Module Title	Brief Description of the Module Content
Unit 1. Basic concepts and history of comparative-historical linguistics	Basic concepts of comparative-historical linguistics. Kinship of languages, genealogical classification, methods and techniques of proving kinship. Reconstruction. The main stages of the method development. Achievements of scientists from Russia and abroad, development of scientific knowledge about the history of languages and language kinship.
Unit 2. Phonetic laws. Proto- language reconstruction	The concept of phonetic law among neogrammarians and in modern linguistics. Phonetic laws in groups and families of related languages. Results of research in the field of Indo-European studies. Grammatical and lexical reconstruction. Modern ideas about proto-linguistic states.
Unit 3. Current issues of comparative-historical linguistics	The limits of the possibilities of the comparative-historical method in linguistics. Principles of scientific etymology. Criteria of scientific competence in comparative linguistics. Forms of language interaction: substratum, superstratum, adstratum, and language unions. Pidgins and Creoles. Linguistic geography: problems and methods. Language areas. Correlation of comparative-historical and typological methods in linguistics.

Course title	Basics of Lexicography	
Workload, credits/ hours	4/144	
	Course contents	
Course Module Title	Brief Description of the Module Content	
Unit 1. Lexicography as a theory and practice	Lexicography as the theory and practice of compiling dictionaries. The most important problems of lexicography.	
Units 2. General typology of dictionaries. classification	The type of any dictionary according to the choice of items included in this dictionary and its practical meaning.
