**Federal State Autonomous Educational Institution of Higher Education**  
**PEOPLES' FRIENDSHIP UNIVERSITY OF RUSSIA**  
**RUDN University**  
**Academy of Engineering**

educational division (faculty/institute/academy) as higher education programme developer

## **INTERNSHIP SYLLABUS**

**Research work / Научно-исследовательская работа**

internship title

**Industrial**

internship type

**Recommended by the Didactic Council for the Education Field of:**

**21.04.01 Oil and gas engineering**

field of studies / speciality code and title

**The student's internship is implemented within the professional education programme of higher education:**

**Oil and gas engineering / Технологии добычи и транспортировки нефти и газа**

higher education programme profile/specialisation title

## 1. INTERNSHIP GOAL(s)

The goal of the Internship «Research work / Научно-исследовательская работа» is the preparation of the undergraduate both for independent research, the main result of which is the writing and successful defense of the master's thesis, and for conducting scientific research as part of a creative team; as well as the formation of a master's general cultural, personal and professional competencies aimed at developing the skills of planning and organizing scientific research and the ability to conduct R&D using various equipment and computer technologies.

The main objectives of the «Research work / Научно-исследовательская работа» are:

- to process the results obtained, analyze and present them in the form of completed research developments (research report, abstracts, scientific articles, term papers, master's thesis);
- to formalize the results of the work performed in accordance with the requirements;
- to be responsible for the quality of work performed;
- to develop other skills and abilities necessary for a master's student in a specific master's program.

## 2. REQUIREMENTS FOR LEARNING OUTCOMES

The internship «Research work / Научно-исследовательская работа» is aimed at the formation of the following competencies (parts of competencies) of students:

*Table 2.1. List of competencies formed by students during the practice (learning outcomes based on the results of the practice)*

Code	Competence	Competence achievement indicators (within this discipline)
SPC-1	Able to use theoretical knowledge when performing technological scientific research in the field of development, transportation and processing of oil and gas	SPC-1.1 Knows fundamental concepts in the field of geology of oil and gas fields, methods of forecasting, prospecting and exploration of mineral deposits; regulatory and methodological documents in the field of hydrocarbon production and development of oil and gas fields SPC-1.2 Can use theoretical knowledge and mining and geological information to carry out technological scientific research, as well as apply knowledge of regulatory and methodological documents to assess oil and gas fields SPC-1.3 Has the theoretical knowledge, methods of subsurface research in the field of oil and gas field development; skills to perform production, technological and engineering research in the field of hydrocarbon production, development of oil and gas fields
SPC-2	Able to develop and implement new advanced technologies in the field of geological exploration, evaluation and estimation of hydrocarbon raw materials	SPC-2.1 Knows the methodological provisions, instructions and requirements for the geological study of the subsoil and geological exploration; the reserve estimation and management policy of the organization; rules for compiling documentation in the field of reserves estimation and management; technologies for conducting, processing and interpreting geological and geophysical works; exploration technologies ; national and global trends in the development of advanced technologies SPC-2.2 Can manage the production activities of the entrusted structural unit; check the design documentation for compliance with the requirements of existing norms and rules; introduce advanced technologies in the process of prospecting and exploration of oil and gas fields; develop

Code	Competence	Competence achievement indicators (within this discipline)
		proposals and take prompt measures aimed at improving the quality of exploration activities SPC-2.3 Has the skills for studying Russian and foreign experience in matters of assessing and managing reserves; skills for preparing proposals for new methods and technologies in the field of geological exploration and reserve estimation; skills for supervising the execution of case studies and research and development activities
SPC-3	Able to assess resources, calculate estimate and recalculate re-estimate hydrocarbon reserves for the preparation of scientific and technological projects planning.	SPC-3.1 Knows the current legislative, regulatory legal acts of the Russian Federation, norms and rules in the field of assessing reserves and managing reserves; regulations, provisions, instructions and standards of the organization in reserve estimation and management; rules for compiling documentation for ongoing exploration programs; rules for compiling documentation for prospective exploration programs; rules for drawing up planning documentation; norms and rules for the development of project documentation; the quality policy of the organization in the field of geological exploration; technologies for conducting, processing and interpreting geological and geophysical works; features of geological exploration. SPC-3.2 Can develop recommendations for further study of the deposit to clarify the geological structure and reserves; apply the requirements of regulatory documents in the assessment of hydrocarbon resources and reserves; prepare materials used in the development of exploration programs for reserve estimation and management; draw up documentation for current and prospective exploration programs; analyze the quality of current exploration programs for reserve estimation and management; control the implementation and results of the development of current and prospective work programs for reserve estimation and management. SPC-3.3 Has the skills to analyze and evaluate the organization's resource base; skills in the development of current and prospective programs of geological exploration in order to clarify hydrocarbon reserves in the territory of the organization; the skills for high-quality and timely estimation (re-estimation) of reserves for individual objects; the skills for preparation in the established order of operational reporting

### 3. INTERNSHIP IN HIGHER EDUCATION PROGRAMME STRUCTURE

The internship «Research work / Научно-исследовательская работа» refers to the compulsory (disciplines) part of module of block 2 of the curriculum.

As part of the HEP HE, students also master disciplines and / or other practices that contribute to the achievement of planned learning outcomes of practice «Research work / Научно-исследовательская работа».

Table 3.1. The list of the HEP HE's components that contribute to the achievement of the planned learning outcomes of the practice

Code	Name of competence	Previous disciplines/modules, practices*	Subsequent disciplines/modules, practices*
SPC-1	Able to use theoretical knowledge when performing technological scientific research in the field of development, transportation and processing of oil and gas	Applications of Geoinformation Systems / Практикум применения геоинформационных систем Research work (obtaining primary skills in research work) / Научно-исследовательская работа (получение первичных навыков научно-исследовательской работы)	Pre-graduate practice / Преддипломная практика SFC
SPC-2	Able to develop and implement new advanced technologies in the field of geological exploration, evaluation and estimation of hydrocarbon raw materials	Resource estimation, computation and recalculation of hydrocarbon reserves / Оценка ресурсов, подсчет и пересчет запасов углеводородов Research work (obtaining primary skills in research work) / Научно-исследовательская работа (получение первичных навыков научно-исследовательской работы)	Pre-graduate practice / Преддипломная практика SFC
SPC-3	Able to assess resources, estimate and re-estimate hydrocarbon reserves for scientific and technological projects planning	Resource estimation, computation and recalculation of hydrocarbon reserves / Оценка ресурсов, подсчет и пересчет запасов углеводородов Research work (obtaining primary skills in research work) / Научно-исследовательская работа (получение первичных навыков научно-исследовательской работы)	Pre-graduate practice / Преддипломная практика SFC

\* - to be filled in accordance with the matrix of competencies and CMS HEP HE

#### 4. SCOPE OF PRACTICE

General workload for «Research work / Научно-исследовательская работа» is 12 credit units (432 academic hours).

#### 5. CONTENT OF PRACTICE

Table 5.1. Content of practice \*

Name of practice section	Contents of the section (topics, types of practical activities)	intensity, acc.hrs.
Section 1. Organizational and preparatory	Receiving an individual task from the head	2
	Workplace safety instruction (in the laboratory and/or production site)	4

Name of practice section	Contents of the section (topics, types of practical activities)	intensity, acc.hrs.
	Selection and approval of the research topic, study of the degree of scientific development of the problem	10
Section 2. Main	Research stage. Observation and information collection activities	100
	Stage of processing and analysis of the collected information. Processing and systematization of factual and literary material	170
	Data prediction	100
	Current control of the practice by the the supervisor	18
	Keeping the supervisor journal	10
Preparation of practice report		9
Preparation for defense and defense of the practice report		9
<b>TOTAL:</b>		<b>432</b>

\* - the content of practice by sections and types of practical training is FULLY reflected in the student's practice report.

## 6. MATERIAL AND TECHNICAL SUPPORT FOR PRACTICE

Bld. 5, 8, Podolskoye Highway Classroom: room No. 360	A set of specialized furniture; chalk board; technical means: projection screen; multimedia projector SANYO plc xt20; system block DEPO Neos 220
Bld. 5, 8, Podolskoye Highway Mining Machinery Laboratory No. 358	Computer with pre-installed licensed software "ARMARIS" Intel Core 15 processor; "Wellhead equipment" - mock-up bench; 32" LED TV 3D on a rack; Layout - controller "Electon-09 1" from SU "Electon 05-250 » in compact design
Bld. 5, 8, Podolskoye Highway Laboratory of rational subsoil use No. 337	A set of specialized furniture; hardware: Acer V193L monitor, RAMEC STORM W system unit, keyboard, computer mouse-4; Plotter Hewlett Packard C7770B; Creative WebCam Live Motion 1 Camera, NIKON LV100D Microscope, AdventurerProRV214 Electronic Laboratory Balance, AdventurerProRV313 Electronic Laboratory Balance, Scimitar1000FT-IR IR Fourier Spectrometer, energy dispersive X-Ray fluorescence analyzer "PRISMA-ECO", High pressure reactor K201-512
Bld. 5, 8, Podolskoye Highway Mining machine laboratory No. 362	A set of specialized furniture; Drilling simulator "Transas SHELF 6000 Drill"; Additional trainee seat for the drilling simulator "Transas SHELF 6000 Drill"
Bld. 5, 8, Podolskoye Highway Laboratory of hydrodynamic processes of oil and gas production No. 341	Ejector; Bench desktop, Instrumentation and shut-off and control valves; Tank; Pump-ejector system bench, left view; laser diode; Column with liquid; Air compressor; Gas supply system to the column; Gas meter; pressure gauge; Photodiode; Digital oscilloscope

## 7. PRACTICE METHOD

The practice «Research work / Научно-исследовательская работа» can be carried out both in the structural divisions of RUDN University or in the organizations of Moscow (inside practice), and at bases located outside of Moscow (outside practice).

The practice on the basis of an external organization (outside the RUDN University) is carried out on the basis of an appropriate agreement, which specifies the terms, place and conditions for conducting an internship in the host organization.

The timing of the practice corresponds to the period specified in the academic schedule of the HEP HE. The timing of the practice can be adjusted upon agreement with the Department of Educational Policy and the Department for the organization of practice and students employment at RUDN University.

## 8. EDUCATIONAL AND METHODOLOGICAL AND INFORMATION SUPPORT FOR PRACTICE

- ELS " Yurayt " <http://www.biblio-online.ru>
- ELS "Student Consultant" [www.studentlibrary.ru](http://www.studentlibrary.ru)
- EBS "Lan" <http://e.lanbook.com/>
- EBS "Trinity Bridge"

2) Databases and search engines:

- electronic fund of legal and normative-technical documentation <http://docs.cntd.ru/>
- Yandex search engine <https://www.yandex.ru/>
- Google search engine <https://www.google.ru/>
- abstract database SCOPUS <http://www.elsevierscience.ru/products/scopus/>

*Educational and methodological materials for practice, filling out a practice journal and preparing a practice report* \*:

- 1) Rules for safe working conditions and fire safety during the practice of «Research work / Научно-исследовательская работа» (initial briefing).
- 2) The general arrangement and principle of operation of technological production equipment used by students during their internship; flow charts and regulations, etc.
- 3) Guidelines for filling in a diary by students and preparing a practice report.

\* - all educational and methodological materials for practice are posted in accordance with the current procedure on the page of practice in TUIS

## **9. EVALUATION MATERIALS AND SCORE-RATING SYSTEM FOR ASSESSING THE LEVEL OF FORMATION OF COMPETENCES ON THE RESULTS OF PRACTICE**

Marking criteria (MC) and a 100-point (score) scale (PSS)\* for assessing the level of competency (part of competencies) formation based on the results of practice «Research work / Научно-исследовательская работа» are presented in the Appendix to this Practice Program (module).

\* - MC and PSS are formed on the basis of the requirements of the relevant local normative act of the Peoples' Friendship University of Russia.

### **DEVELOPERS:**

Associate Professor of the Department of Mineral  
Developing and Oil&Gas Engineering  
\_\_\_\_\_  
Position, Department

\_\_\_\_\_  
Signature

Tyukavkina O.V.  
\_\_\_\_\_  
Full name

### **Head of Department:**

Director of the Department of Mineral Develop-  
ing and Oil&Gas Engineering
