COURSE SYLLABUS

ENVIRONMENTAL-ECONOMIC ASPECTS OF ENVIRONMENTAL PROJECTS

(наименование дисциплины/модуля)

Recommended by the Methodological Council for the Education Field:

05.04.06 Ecology and nature management

(код и наименование направления подготовки/специальности)

The discipline is mastered within the framework of the main professional higher education program:

Economics of natural resources management

(наименование (профиль/специализация) ОП ВО)

1. COURSE GOALS

The purpose of the discipline is to get acquainted with basics of environmental and economic justification of a project cycle and reduction of environmental risk on all stages of project activities.

2. LEARNING OUTCOMES

The mastering of the discipline "Environmental-economic aspects of environmental projects" is aimed at the formation of the following competencies (parts of competencies) in students:

Table 2.1. List of competencies formed by students during the development of the discipline (LEARNING OUTCOMES)

	Indicators of competence achievement				
Code	Competence	(within the framework of this discipline)			
	Able to use special	GPC -2.1 Knows the basics of ecology, geoecology,			
	and new sections of	environmental economics and circular economy, as well as			
	ecology, geoecology	environmental management			
GPC-2	and nature	GPC -2.2 Able to use environmental, economic and other special			
GrC-2	management in	knowledge and algorithms to solve professional problems			
	solving research and	GPC -2.3 Able to find, analyze and competently use the latest			
	applied problems of	information and modern techniques in the performance of			
	professional activity.	research and applied tasks			
	Able to apply	GPC -3.1 Knows the principles and methods of environmental			
	environmental	monitoring of environmental components			
	research methods to	GPC -3.2 Owns analytical methods for monitoring pollutants and			
GPC-3	solve research and	physical impacts and processing the information received			
	applied problems of	GPC -3.3 Able to develop systems for environmental monitoring			
	professional activity	and control in production and solve applied problems in			
		professional activities			
	Able to develop	SPC-5.1 Able to develop and plan the implementation of standard			
	standard	environmental measures, taking into account international practice			
	environmental	and the requirements of national legislation			
	measures and assess	SPC-5.2. Has the skills to assess the impact of planned structures			
SPC-5	the impact of	or other forms of economic activity on the environment			
	planned facilities or	SPC-5.3 Knows the requirements for the preparation and			
	other forms of	implementation of programs for the environmental modernization			
	economic activity on	of enterprises, the introduction of BAT, the organization of			
	the environment	environmental monitoring, accounting and reporting			

3. COURSE IN HIGHER EDUCATION PROGRAMME STRUCTURE

The discipline "Environmental-economic aspects of environmental projects" refers to Compulsory Disciplines of the Higher Education Program.

Within the framework of the higher education program, students also master other disciplines and/or practices that contribute to expected learning outcomes of the discipline "Environmental-economic aspects of environmental projects".

Code	Competence	Previous Disciplines	Subsequent Disciplines		
Code GPC -2	Competence Able to use special and new sections of ecology, geoecology and nature management in solving research and applied problems of professional activity	(Modules) Estimations of natural resources / Оценки природных ресурсов Methodology of scientific creation / Методология научного творчества Economic aspects of natural resources management / Экономические аспекты природопользования History and methology of ecology and natural resources management / История и методология экологии и природопользования Iternational collaboration / Международное сотрудничество Engineering ecology / Инженерная экология Monitoring of environmental impacts / Мониторинг экологических воздействий Industrial safety / Промышленная безопасность Simulation and prevention of accidents / Моделирование и предупреждение аварий Учебная практика / Educational practice Hayчно-исследовательская	(Modules) Environmental norms for sustainability / Экологические нормы для устойчивого развития Management of water resources / Управление водными ресурсами Environmental standards and nature management / Экологические стандарты и природопользование Modern remediation technologies / Современные технологии ремедиации Modern technologies for nature protection / Современные технологии защиты окружающей среды Производственная практика / Production practice HИP / Research work Преддипломная практика / Pre-graduate practice		
GPC-3	Able to apply environmental research methods to solve research and applied problems of professional activity	работа / Research work Estimations of natural resources / Оценки природных ресурсов Economic aspects of natural resources management / Экономические аспекты природопользования Occupational safety and HSE-audit / Охрана труда и HSE-ayдит Wastes: Landfills, Processing and Recycling / Отходы:	Standards of environmental management and occupational safety / Стандарты экологического менеджмента и охраны труда Management of energy resources / Менеджмент ресурсов энергетики Modern technologies for nature protection / Современные технологии защиты окружающей среды

5. COURSE CONTENTS

Table 5.1. The content of the discipline (module) by type of academic work

Name of the discipline section	Content of the section (topics)	Type of academic activity*
Introduction	Projects. Environmental design concept. Stages of development and implementation of the project / Feasibility study of projects. The composition of the feasibility study. Requirements for the content of sections of the feasibility study. Environmental	Seminars
	justification of investment projects. The concept of environmental support of economic activities	
Economic efficiency of investment projects	Methods for assessing the economic efficiency of investment projects. Performance indicators. Taking into account the time factor. The concept of project sustainability and its role in investment decisions	Seminars
Environmental support of economic activities at the pre-project stage	Environmental support of economic activities at the pre-project stage. Basic documentation. Expertise of projects and ecological justification of projects. The concept of EIA as part of project documentation	Seminars
Environmental support during the construction phase	Environmental support during the construction phase of the facility. Environmental impacts during construction of facilities and environmental optimization	Seminars
Environmental support on the stages of operation and liquidation	The stage of operation of facilities and the stage of liquidation (completion of the project): the main types of environmental impact. Procedures and documentation for environmental support of economic activities.	Seminars

6. CLASSROOM EQUIPMENT AND TECHNOLOGY SUPPORT REQUIREMENTS

Classroom for Academic Activity Type	CLASSROOM EQUIPMENT	Specialized learning, laboratory equipment, software and materials for the mastering the course
Seminars	Classroom, equipped with a set of specialized furniture; whiteboard; a set of devices includes portable multimedia projector, laptop, projection screen, Stable wireless Internet connection. Software: Microsoft Windows,	

 Table 6.1. Classroom equipment and technology support requirements

Classroom for Academic Activity Type	CLASSROOM EQUIPMENT	Specialized learning, laboratory equipment, software and materials for the mastering the course
	MS Office / Office 365, MS Teams, Chrome (latest stable release), Skype	
Self-studies	An auditorium for independent work of students (can be used for seminars and consultations), equipped with a set of specialized furniture and computers with access to an electronic information and educational environment.	-

-

Educational and methodological materials for independent work of students during the development of the discipline/ module *:

1. A course of lectures on the discipline "Environmental-economic aspects of environmental projects".

* - all educational and methodological materials for independent work of students are placed in accordance with the current procedure on the discipline page in the Telecommunication educational and Information System!

8. MID-TERM ASSESSMENT AND EVALUATION TOOLKIT

Evaluation materials and a point-rating system* for assessing the level of competence formation (part of competencies) based on the results of mastering the discipline "Environmental-economic aspects of environmental projects" are presented in the Appendix to this Work Program of the discipline.

* - evaluation toolkit and ranking system are formed on the basis of the requirements of the relevant local regulatory act of the RUDN (regulations / order).
