## Информация Federal State Autonomous Educational Institution for Higher Education

ФИО: Ястребов Олег Алексарте OPLES' FRIENDSHIP UNIVERSITY OF RUSSIA Должность: Ректор **RUDN** University

Дата подписания: 21.05.2025 17:51:47

Уникальный программный ключ:

ca953a0120d891083f939673078ef1a989dae1 Higher School of Management

educational division (faculty/institute/academy) as higher education programme developer

#### **COURSE SYLLABUS**

Lean Manufacturing course title

## Recommended by the Didactic Council for the Education Field of:

38.04.02 Management

field of studies / speciality code and title

The course instruction is implemented within the professional education programme of higher education:

**Engineering Management** 

higher education programme profile/specialisation title

## 1. COURSE GOAL(s)

The goal of mastering the Lean Manufacturing discipline is to build in students the theoretical knowledge and skills of applying the lean manufacturing approach.

## 2. REQUIREMENTS FOR LEARNING OUTCOMES

The mastering of the Lean Manufacturing discipline envisages building the following competencies (parts of competencies) in students:

Table 2.1. List of competences that students acquire through the course study								
Competence	Competence descriptor	Competence formation indicators						
code		(within this course)						
GC-3	Ability to perform critical analysis of problematic situations based on the systemic approach and develop a plan of action.	GC-3.1. Know: - economic and mathematical models of the modern market economy; - methods of analysis, synthesis and generalization; GC-3.2. Be able to: - gather and systematize the necessary economic information efficiently; - analyze economic phenomena and processes in their correlation; - to make logical thoughts necessary for effective management decision-making; GC-3.3. Master: - modern methods of economic analysis; - computer technologies for data collection, systematization and processing; - the ability of self-knowledge, self-actualization, self-						
GC-6	Capability to determine and implement the priorities of his/her own activities and ways to improve it based on self-assessment.	reflection; GC-6.1 Controls the amount of time spent on specific activities GC-6.2 Develops tools and time management techniques when performing specific tasks, projects, goals GC-6.3 Analyzes its resources and their limits (personal, situational, temporary, etc.) for the successful completion of the task GC-6.4 Allocates tasks for long-, medium- and short-term with justification of relevance and analysis of resources for their implementation						
PC-1	Capability to manage the efficiency of an investment project	PC-1.1 Defines the operations and their sequence to implement the investment project. PC-1.2 Evaluates operational, estimates human resources and determines the participants in the investment project PC-1.3 Plans the implementation stages of the investment project, ensures the quality and quality control of the investment project implementation PC-1.4 Can work in specialized computer programs for the preparation and investment project implementation PC-1.5 Can search the necessary information for the preparation and implementation of an investment project						

Competence code	Competence descriptor	Competence formation indicators (within this course)
		PC-1.6 Can identify and assess the degree (level) of an investment project risks and develop measures to
		manage them

## 3.COURSE IN HIGHER EDUCATION PROGRAMME STRUCTURE

The *Lean manufacturing* is an independent discipline that is an integral part of the Management educational program 38.04.02. It is an elective part of the curriculum.

Table 3.1. The list of the higher education programme components/disciplines that contribute to the achievement of the expected learning outcomes as the course study results

Compet ence code	Competence descriptor	Previous courses/modules*	Subsequent courses/modules*
GC-3	Capability to organize and lead the team's work developing a team strategy to achieve the goal	Organization and Production Management	Master's Degree R&D Pre-graduation Practice Preparing for defense and defense of the degree thesis
GC-6,	Capable to determine and implement the priorities of his/her own activities and ways to improve it based on selfassessment.	Strategic Management in Industrial Companies	Master's Degree R&D Pre-graduation Practice Preparing for defense and defense of the degree thesis
PC-1	Capability to manage the efficiency of an investment project	Innovation Management	Master's Degree R&D Pre-graduation Practice Preparing for defense and defense of the degree thesis

## 4. COURSE WORKLOAD AND ACADEMIC ACTIVITIES

The total workload of the discipline is 3 credits.

Table 4.1. Types of academic activities during the periods of higher education

programme mastering (full-time training)\*

programme mastering (pure m	Total	Semesters/training modules							
Type of academic activi	academic hours	1	2	3	4				
Contact academic hours		36			36				
including:									
Lectures (LC)		18			18				
Lab work (LW)									
Seminars (workshops/tutorials)	(S)	18			18				
Self-studies		63			63				
Evaluation and assessment (exam/passing/failing grade)		9			9				
Course workload academic hours_		108			108				
credits		3			3				

## **5. COURSE CONTENTS**

Course module		Academic activities types
title	Course module contents (topics)	
<b>Subject 1.</b> The	Causes and Case History (T.Ono,	LC, S
Basics of a Lean	S.Shingo, Tapping, Laro)	
Office.		
Subject 2. Lean	Options of Conceptual	LC, S
Office Concept	Representations of Lean Office and	
and Philosophy	their Fundamental Differences	
Subject 3.	The Main Characteristics of the Lean	LC, S
Principles of	Flow and its Parameters	
Creating a Lean	Differences Between a Lean Office	
Office (value, SC	and a Traditional One	
flow and losses)		
,		
Subject 4.	Lean Office Deployment Models	LC, S
Systems and	(levels, stages, depth of changes)	
Tools for		
Creating a Lean		
Office		

# 6. CLASSROOM EQUIPMENT AND TECHNOLOGY SUPPORT REQUIREMENTS

Table 6.1. Classroom equipment and technology support requirements

Classroom Type	Equipment of the Classroom	Specialized Educational/Laboratory Equipment, Software and Materials for the Discipline (if necessary)
Lecture Hall	An auditorium for conducting lecture-type classes, equipped with a set of specialized furniture; a board (screen) and technical means of multimedia presentations.	21 workplaces: system unit P4 C2D/3160 MHz MB/ 320 GB/DVD±RW/ LCD monitor 19"+ 1 projector
Colloquium	A classroom for conducting colloquium-type classes, group and individual consultations, ongoing monitoring and midterm assessment, equipped with a set of specialized furniture and multimedia presentation equipment.	21 workplaces: system unit P4 C2D/3160 MHz MB/ 320 GB/DVD±RW/ LCD monitor 19"+ 1 projector
Computer Class	A computer classroom for conducting classes, group and individual consultations, continuous control and midterm assessment, equipped with personal computers ( pcs.), a blackboard (screen) and multimedia presentation technical means.	21 workplace: Celeron system unit/2600 MHz/1280 MB/ 40 GB/DVD ROM/ LCD monitor 17"+ 1 projector + WiFi access point

Classroom Type	Equipment of the Classroom	Specialized Educational/Laboratory Equipment, Software and Materials for the Discipline (if necessary)
Autonomous Work of Students	A classroom for autonomous work of students (can be used for seminars and consultations), equipped with a set of specialized furniture and computers with access to EIEE.	21 workplaces: system unit P4 C2D/3160 MHz MB/ 320 GB/DVD±RW/ LCD monitor 19"+ 1 projector

#### 7. RESOURCES RECOMMENDED FOR COURSE STUDY

## a) Main Readings:

- 1. James P. Womack, Daniel Jones Lean thinking: banish waste and create wealth in your corporation (MUST READ series). –Moscow: Alpina Publisher, 2025. –472c
- 2. Tsarenko, A. S. Berezhlivoye myshlenie v gosudarstvennom upravlenii [Lean thinking in public administration]: a monograph / A. S. Tsarenko, O. Y. Guselnikova. Moscow: Yurayt Publishing House, 2025. 206 p. (Current monographs). ISBN 978-5-534-13961-7. Text: electronic // EBS Yurayt [website]. URL: https://urait.ru/bcode/477258

#### b) Additional Readings:\_

- 3. Ya. Monden Toyota production systems edited translation from English edited by A.R. Benediktov and V.V. Motyleva. —M.: Economics. —1989.
- 4. Staroverova, K. O. Osnovy berezhlivogo proizvodstva [Fundamentals of lean production]: a textbook for secondary vocational education / K. O. Staroverova. Moscow: Yurayt Publishing House, 2023. 74 p.

BiblioRossika An electronic library for students, professors and researchers. <a href="http://www.bibliorossica.com/individuals.html?ln=ru">http://www.bibliorossica.com/individuals.html?ln=ru</a>

Microsoft Teams software, university telecommunication training and information system of RUDN Resources of the Internet information and telecommunication network:

- 1. Electronic libraries (EL) of RUDN University and other institutions, to which university students have access on the basis of concluded agreements
- RUDN Electronic Library System (RUDN ELS) <a href="http://lib.rudn.ru/MegaPro/Web">http://lib.rudn.ru/MegaPro/Web</a>
  - 2. Databases and search engines:
  - electronic foundation of legal and normative-technical documentation http://docs.cntd.ru/
  - Yandex search engine <a href="https://www.yandex.ru/">https://www.yandex.ru/</a>
- Google search engine https://www.google.ru/

The following training toolkit for the student's autonomous work is envisaged as part of mastering the discipline/module\*:

- 1. A course of lectures on the Lean Production discipline.
- 2. Laboratory workshop on the Lean Production discipline (if laboratory work is available): not available.
- 3. Methodological guidelines for drafting and formatting the course paper/project on the Lean Production discipline (if there are ones).

The implementation of the course provides interactive lectures, practical classes (colloquiums) using multimedia equipment, preparation of autonomous creative projects and their subsequent presentations, testing, group discussions on the subject of the course, modern knowledge control technologies.

While studying the discipline, the student must attend a course of lectures, participate in the number of colloquiums provided by the course syllabus, study autonomously some topics of the course and confirm their knowledge during control activities.

The student's work in lectures consists in clarifying the basics of the discipline, briefly taking notes of the material, and clarifying issues that cause difficulties. The lecture notes are the basic educational material along with the textbooks recommended in the main list of readings.

The teaching of the main part of the lecture material involves usage of multimedia tools that facilitate the comprehension and consolidation of the material. Presentations are available for download from the RUDN website and can be freely used by students for educational purposes.

The student must master all the topics provided for by the educational and thematic plan of the discipline. Individual topics and training issues must be mastered autonomously. The student studies the recommended literature, briefly outlines the material, and clarifies the most difficult questions that require clarification during consultations. The same should be done with sections of the course that were skipped due to various circumstances.

For an in-depth study of the issue, the student should study the literature from the additional readings list and specialized websites. It is also recommended that students communicate in professional community forums.

Students study educational, scientific literature and periodicals on an autonomous basis. They have the opportunity to discuss what they have read with the teachers of the discipline during scheduled consultations, with other students at colloquiums, as well as at lectures, asking the professor questions.

The control of autonomous work is carried out by the professor in charge. Depending on the teaching methodology, the following forms of continuous assessment can be used: a short oral or written survey before the start of classes, tests, control papers, written homework, essays, etc.

## 8. ASSESSMENT TOOLKIT AND GRADING SYSTEM\* FOR EVALUATION OF STUDENTS' COMPETENCES LEVEL UPON COURSE COMPLETION

**DEVELOPERS:** 

position, name of the department

Deputy Head of the Applied Economics Department

The assessment materials and the grading system\* to evaluate the graduate's level of competences (part of competences) formation as the results of the Lean Production discipline are specified in the Appendix to course syllabus.

Associate Professor of the Applied Economics Department	V.A. Ermakov
