**Federal State Autonomous Educational Institution of Higher Education  
PEOPLES' FRIENDSHIP UNIVERSITY OF RUSSIA  
NAMED AFTER PATRICE LUMUMBA  
RUDN University  
Institute of Medicine**

---

educational division (faculty/institute/academy) as higher education programme developer

## **COURSE SYLLABUS**

---

**Dental oncology and radiotherapy**

course title

---

**Recommended by the Didactic Council for the Education Field of:**

**31.05.03 Dentistry**

---

field of studies / speciality code and title

**The course instruction is implemented within the professional education programme of higher education:**

**Dentistry**

---

higher education programme profile/specialisation title

## 1. COURSE GOAL(s)

The goal of the course «Dental Oncology and Radiotherapy» is to equip students with knowledge of identifying and implementation a diagnosis of tumor lesions, benign and malignant tumors of the oral and maxillofacial area and neck, assist patients and decide on organizational matters.

## 2. REQUIREMENTS FOR LEARNING OUTCOMES

Mastering the course (module) «Dental Oncology and Radiotherapy» is aimed at the development of the following competences /competences in part: GPC-1.4, SPC-1.5.

*Table 2.1. The list of competencies formed by students during the development of the discipline (results of the mastering of the discipline)*

Competence code	Competence	Competence indicators
GPC-1	Being able to make an examination of a patient in order to determine a diagnosis.	GPC-1.4. Detecting if patients have risk factors for oncopathology (including various background processes, precancerous conditions) based on laboratory, instrumental and additional examinations in order to make a preliminary/final diagnosis.
		GPC-1.5. Making a preliminary/final diagnosis based on the patient examination; laboratory and instrumental examinations.

## 3. COURSE IN HIGHER EDUCATION PROGRAMME STRUCTURE

The course refers to the core/variable/elective\* component of (B1) block of the higher educational programme curriculum.

\* - Underline whatever applicable.

Within the higher education programme students also master other (modules) and / or internships that contribute to the achievement of the expected learning outcomes as results of the course study.

*Table 3.1. The list of the higher education programme components/disciplines that contribute to the achievement of the expected learning outcomes as the course study results*

Competence code	Competence descriptor	Previous courses/modules*	Subsequent courses/modules*
GPC-1	Being able to make an examination of a patient in order to determine a diagnosis.	Radiology Dermatovenerology Neurology Psychiatry and Narcology	Forensic Medicine

Competence code	Competence descriptor	Previous courses/modules*	Subsequent courses/modules*
		Otorhinolaryngology Ophthalmology	

#### 4. COURSE WORKLOAD AND ACADEMIC ACTIVITIES

The total workload of the course is 2 credits (72 academic hours).

Table 4.1. Types of academic activities during the periods of higher education programme mastering (**full-time training**)\*

Type of academic activities	Total academic hours	Semesters/training modules	
		9	
<i>Contact academic hours</i>	<b>48</b>	<b>48</b>	
including:			
Lectures (LC)			
Lab work (LW)	<b>48</b>	<b>48</b>	
Seminars (workshops/tutorials) (S)			
<i>Self-studies</i>	<b>24</b>	<b>24</b>	
<i>Evaluation and assessment (exam/passing/failing grade)</i>	<b>3</b>	<b>3</b>	
<b>Course workload</b>	academic hours	<b>72</b>	<b>72</b>
	credits	<b>2</b>	<b>2</b>

#### 5. COURSE CONTENTS

Table 5.1. Course contents and academic activities types

Course module title	Course module contents (topics)	Academic activities types
1 Current treatments of cancer and hematological disorders. Indications. Side effects. Complications. Treatment.  Demonstration of clinical	Interdisciplinary niche. Concept. Oncological alertness of a dentist, its species. The structure of the oncology service in Russia, the organization of care for patients with malignant tumors. Analysis of clinical cases requiring interdisciplinary training dentist.	LW

<p>department material.</p> <p>(Including the use of live video from clinical departments RNTSRR)</p> <p>Morphology - the basis for effective</p>		
<p>2 Tumors maxillofacial: squamous cell carcinoma of the oral mucosa and oropharyngeal region. Factors contributing to the development of malignant tumors. Theory of tumors. Species. Demonstration of clinical cases in practice. (Including the use of live video from clinical departments RNTSRR)</p>	<p>Knowledge of morphology is the basis of effective treatment. Practical part.</p> <p>Acquisition and development of skills for sampling morphological material (scraping, stamping, puncture). Indications.</p> <p>The role of the dentist in the primary diagnosis of oncological processes.</p> <p>Stomatoscopy. Dye samples.</p> <p>Thermography, infrared scanning. Ultrasound procedure.</p> <p>CT and MRI. Their role in the complex diagnosis of oncological processes.</p> <p>Biopsy, its types.</p> <p>Cytology. Histology</p>	<p>LW</p>
<p>3 Introduction to radiation therapy. History, biological basis, mechanisms of influence on the tumor. Features of preparation of the patient to</p>	<p>Squamous cell carcinoma of the oral mucosa and oropharyngeal region. Theory of tumors. Species. Demonstration of clinical cases.</p> <p>Vascular tumors of the face and jaws. Tumors of the salivary glands. Classification, clinical picture, diagnosis, differential diagnosis, treatments, prognosis.</p> <p>Osteoblastoklastoma jaws.</p>	<p>LW</p>

<p>conduct external beam radiotherapy. Modern technologies of external beam radiotherapy.
