**Federal State Autonomous Educational Institution of Higher Education
PEOPLES' FRIENDSHIP UNIVERSITY OF RUSSIA
RUDN University**

Agrarian and Technological Institute

educational division (faculty/institute/academy) as higher education programme developer

INTERNSHIP SYLLABUS

Research practice

internship title

Industrial practice

internship type

Recommended by the Didactic Council for the Education Field of:

35.04.04 Agronomy

field of studies / speciality code and title

The student's internship is implemented within the professional education programme of higher education:

Integrated Plant Protection

higher education programme profile/specialisation title

1. RESEARCH PRACTICE GOAL(s)

The purpose of conducting research practice is to master the professional competencies necessary for the formation of a systematic approach to research work among interns and to ensure the practical training of graduate students for independent research activities in higher educational institutions and research centers.

2. REQUIREMENTS FOR LEARNING OUTCOMES

Conducting research practice is aimed at the formation of the following competencies (parts of competencies) among students:

Table 2.1 – List of competencies formed by students during the internship (learning outcomes based on the results of practice)

Code and descriptor of generic competence	Code and competence level indicator
GC-1 Able to search, critical analysis of problem situations based on a systematic approach, develop an action strategy	GC-1.1. Performs the search for the necessary information, its critical analysis and summarizes the results of the analysis to solve the problem; GC-1.2. Uses a systematic approach to solve assigned tasks; GC-1.3. Develops a strategy for achieving the set goal as a sequence of steps, anticipating the result of each of them and assessing their impact on the external environment of the planned activity and on the relationship between the participants in this activity.
GC-2 Able to manage a project at all stages of its life cycle	GC-2.1. Develops the concept of the project within the framework of the identified problem, formulating the goal, objectives, relevance, significance (scientific, practical, methodological and other depending on the type of project), expected results and possible areas of their application; GC-2.2. Forms a schedule for the implementation of the project as a whole and a plan for monitoring its implementation, organizes and coordinates the work of project participants; GC-1.3. Suggests possible ways (algorithms) for putting the results of the project into practice (or implements it).
GC-3 Able to organize and manage the work of the team, developing a team strategy to achieve the goal	GC-3.1 Develops a cooperation strategy and, on its basis, organizes the work of the team to achieve the goal; GC-3.2 Plans team work, distributes tasks and delegates authority to team members, organizes discussion of different ideas and opinions
GC-4 Able to use modern communication technologies in the state language of the Russian Federation and foreign language(s) for academic and professional interaction	GC-4.1 Demonstrates the integrative skills required for writing, translating and editing various academic texts (abstracts, essays, reviews, articles, etc.); GC-4.2 Presents the results of academic and professional activities at various scientific events, including international ones; GC-4.3 Demonstrates the integrative skills necessary to participate effectively in academic and professional discussions
GC-5 Able to analyze and take into account the diversity of cultures in the process of intercultural interaction	GC-5.1 Demonstrates understanding of the characteristics of different cultures and nations;

Code and descriptor of generic competence	Code and competence level indicator
	GC-5.2 Builds social interaction, taking into account the common and special of different cultures and religions.
GC-6 Able to identify and implement the priorities of their own activities and ways to improve it based on self-assessment	GC-6.1 Evaluates his resources and their limits (personal, situational, temporary), uses them optimally for the successful completion of the assigned task; GC-6.2 Plans a professional trajectory, taking into account the characteristics of both professional and other types of activity and the requirements of the labor market.
GC-7 Able to search for the necessary sources of information and data, perceive, analyze, memorize and transmit information using digital means, as well as using algorithms when working with data received from various sources in order to effectively use the information received to solve problems, evaluate information, its reliability, build logical conclusions based on incoming information and data	GC-7.1 Evaluates information, its reliability, builds logical conclusions based on incoming information and data; GC-7.2 Has practical experience in searching, perceiving, storing, analyzing, transmitting information and data using digital tools, algorithms and application programs in order to solve the tasks.
GPC-1 Able to solve the problems of developing the field of professional activity and (or) organization based on the analysis of the achievements of science and production	GPC-1.1 Demonstrates knowledge of the main methods for analyzing the achievements of science and production in agronomy; GPC-1.2 Uses methods for solving problems of the development of agronomy based on the search and analysis of modern achievements in science and production; GPC-1.3 Uses available technologies, including information and communication, to solve the problems of professional activities in agronomy.
GPC-2 Able to transfer professional knowledge, taking into account pedagogical method	GPC-2.1 Knows modern educational technologies of vocational education (vocational training); GPC-2.2 Transfers professional knowledge in the field of agronomy, explains current problems and trends in its development, modern technologies for the production of crop products.
GPC-3 Able to use modern methods of solving problems in the development of new technologies in professional activities	GPC-3.1 Analyzes methods and methods for solving problems of developing new technologies in agronomy; GPC-3.2 Uses information resources, achievements of science and practice in the development of new technologies in agronomy.
GPC-4 Capable of conducting scientific research, analyzing results and preparing reports	GPC-4.1 Analyzes methods and methods for solving research problems; GPC-4.2 Uses information resources, scientific, experimental and instrumental base for research in agronomy; GPC-4.3 Formulates the results obtained in the course of solving research problems.
GPC-5 Able to carry out a feasibility study of projects in professional activities	GPC-5.1 Owns methods of economic analysis and accounting for project indicators in agronomy; GPC-5.2 Analyzes the main production and economic indicators of the project in agronomy;

Code and descriptor of generic competence	Code and competence level indicator
	GPC-5.3 Develops proposals to improve project efficiency in agronomy.
GPC-6 Able to manage teams and organize production processes	GPC-6.1 Able to work with information systems and databases on personnel management issues; GPC-6.2 Defines the tasks of the personnel of the structural unit, based on the goals and strategy of the organization; GPC-6.3 Applies methods of managing interpersonal relationships, building teams, developing leadership and performance, identifying talents, measuring job satisfaction.
GPC-7 Able to use tools for working with large arrays of structured and unstructured information, use modern digital methods for processing, analyzing, interpreting and visualizing data in order to solve the tasks of professional and research activities in the field of agronomy	GPC-7.1 Owns tools for working with large arrays of structured and unstructured information; GPC-7.2 Uses modern digital methods for processing, analyzing, interpreting and visualizing data in order to solve the assigned tasks.
PC-1 Capable of collecting, processing, analyzing and systematizing scientific and technical information, domestic and foreign experience in the field of agronomy	PC-1.1 Carries out a critical analysis of the information received PC-1.2 Conducts information retrieval on improving technologies for growing and protecting crops, including using the Internet
PC-2 Able to develop methods for conducting experiments, master new research methods	PC-2.1 Develops methods for conducting experiments PC-2.2 Applies modern types and methods of conducting observations and records in field experiments
PC-3 Able to organize, conduct and analyze the results of experiments (field experiments)	PC-3.1 Owns modern methods of processing research results using methods of mathematical statistics PC-3.2 Organizes field experiments to assess the effectiveness of innovative technologies in production conditions
PC-4 Able to create models of crop cultivation technologies, plant protection systems, varieties	PC-4.1 Applies modern methods of mathematical statistics to build models of various crop cultivation technologies, plant protection systems, varieties PC-4.2 Is able to highlight the main and secondary components of models in order to accelerate their development PC-4.3 Carries out the creation of plant protection systems for specific production conditions PC-4.4 Has the skills to organize plant protection work adapted to the soil and climatic conditions of the region PC-4.5 Works to protect plants from harmful objects PC-4.6 Develops and improves measures to protect plants from harmful objects
PC-5 Able to prepare scientific and technical reports, reviews and scientific publications based on the results of research	PC-5.1 Draws up a research program to study the effectiveness of agricultural practices PC-5.2 Uses the methods of mathematical statistics when processing data and preparing a report PC-5.3 Knows how to correctly compose the results of research in articles, textbooks and monographs

Code and descriptor of generic competence	Code and competence level indicator
PC-6 Able to prepare conclusions on the feasibility of introducing the studied methods, varieties and hybrids of agricultural crops into production based on the analysis of experimental data	PC-6.1 Able to work with information systems and databases on the management of agricultural production PC-6.2 Is able to argue the need to use plant protection technologies for the accelerated development of agricultural enterprises
PC-7 Able to carry out phytosanitary control at the state border in order to protect the territory of the Russian Federation from the penetration of quarantine and other dangerous pathogens and pests of plants, weeds	PC-7.1 Recognizes quarantine objects and identifies quarantine pests and pathogens PC-7.2 Conducts an examination of crops and crop products for the presence of quarantine objects

3. INTERNSHIP IN HIGHER EDUCATION PROGRAMME STRUCTURE

The internship refers to the core component of (B2) block of the higher educational programme curriculum.

Within the higher education programme students also master other disciplines (modules) and / or internships that contribute to the achievement of the expected learning outcomes as results of the internship.

Table 3.1. The list of the higher education programme components that contribute to the achievement of the expected learning outcomes as the internship results.

Competence code	Competence descriptor	Previous courses/modules, internships*	Subsequent courses/modules, internships*
GC-1	Able to search, critical analysis of problem situations based on a systematic approach, develop an action strategy		
GC-2	Able to manage a project at all stages of its life cycle		
GC-3	Able to organize and manage the work of the team, developing a team strategy to achieve the goal		
GC-4	Able to use modern communication technologies in the state language of the Russian Federation and foreign language(s) for academic and professional interaction		
GC-5	Able to analyze and take into account the diversity of cultures in the process of intercultural interaction		
GC-6	Able to identify and implement the priorities of their own activities and ways to improve it based on self-assessment		
GC-7	Able to search for the necessary sources of information and data, perceive, analyze, memorize and transmit information using digital means, as well as using algorithms		

Competence code	Competence descriptor	Previous courses/modules, internships*	Subsequent courses/modules, internships*
	when working with data received from various sources in order to effectively use the information received to solve problems, evaluate information, its reliability, build logical conclusions based on incoming information and data		
GPC-1	Able to solve the problems of developing the field of professional activity and (or) organization based on the analysis of the achievements of science and production		
GPC-2	Able to transfer professional knowledge, taking into account pedagogical method		
GPC-3	Able to use modern methods of solving problems in the development of new technologies in professional activities		
GPC-4	Capable of conducting scientific research, analyzing results and preparing reports		
GPC-5	Able to carry out a feasibility study of projects in professional activities		
GPC-6	Able to manage teams and organize production processes		
GPC-7	Able to use tools for working with large arrays of structured and unstructured information, use modern digital methods for processing, analyzing, interpreting and visualizing data in order to solve the tasks of professional and research activities in the field of agronomy		
PC-1	Capable of collecting, processing, analyzing and systematizing scientific and technical information, domestic and foreign experience in the field of agronomy		
PC-2	Able to develop methods for conducting experiments, master new research methods		
PC-3	Able to organize, conduct and analyze the results of experiments (field experiments)		
PC-4	Able to create models of crop cultivation technologies, plant protection systems, varieties		
PC-5	Able to prepare scientific and technical reports, reviews and scientific publications based on the results of research		

Competence code	Competence descriptor	Previous courses/modules, internships*	Subsequent courses/modules, internships*
PC-6	Able to prepare conclusions on the feasibility of introducing the studied methods, varieties and hybrids of agricultural crops into production based on the analysis of experimental data		
PC-7	Able to carry out phytosanitary control at the state border in order to protect the territory of the Russian Federation from the penetration of quarantine and other dangerous pathogens and pests of plants, weeds		

4. INTERNSHIP WORKLOAD

The total workload of the internship is 15 credits (540 academic hours).

5. INTERNSHIP CONTENTS

Table 5.1. Internship contents

Modules	Contents (topics, types of practical activities)	Workload, academic hours
Module 1. Preparatory stage	Working meeting at the department	1 week: 1-2 days
	Acquaintance with the scientific and publishing activities of the Department of Soil Science, General Agriculture and Crop Production named after V.D. Muhi	
	Study and analysis of scientific sources on a selected topic, determination of the degree of its elaboration in the scientific literature	Days 3-4
	Visit to the scientific library of the Academy. Work in the library with EBS, electronic educational resources, book supply maps, etc.	5th day
	Adjustment of the research plan and the scheme of experience together with the supervisor	Week 2: Day 1
	Selection and purchase of the necessary materials for the foundation of the experiment (seeds, fertilizers, biological products), taking into account the available on the farm	2nd day
Module 2. Practical stage	Safety instruction at the workplace. Inspection of the farm and the place for bookmarks of experience	3rd day
	Analysis of the economic and research activities of a scientific institution (basic economy)	4-5 days of 2nd week and all days of 3rd and 4th weeks
	Conducting research (bookmarking the experience; conducting related observations and accounting)	
	Verification of the hypothesis put forward	
Module 3. Intermediate certification	Presentation of the results of scientific research. Collection, processing and analysis of collected	Last day of practice

Modules	Contents (topics, types of practical activities)	Workload, academic hours
	materials and primary documentation	
	Writing a report, preparing a presentation	
	Internship interview, review of the content of the internship report	
	Conference on Scientific Research Practice	According to the plan
TOTAL:		540

6. INTERNSHIP EQUIPMENT AND TECHNOLOGY SUPPORT REQUIREMENTS

The place of the research internship and its specific content are determined by the specifics of the master's degree program in which the student is studying and his scientific interests. Depending on this, it can be carried out both at an enterprise (advanced farms of various forms of ownership), in an institution, organization, and in a structural subdivision of the academy (experimental field of the faculty, branches of graduate departments, production departments of the faculty).

7. INTERNSHIP LOCATION AND TIMELINE

The internship can be carried out at the structural divisions of RUDN University (at Moscow-based organisations, as well as those located outside Moscow).

The internship at an external organisation (outside RUDN University) is legally arranged on the grounds of an appropriate agreement, which specifies the terms, place and conditions for an internship implementation at the organisation.

The period of the internship, as a rule, corresponds to the period indicated in the training calendar of the higher education programme. However, the period of the internship can be rescheduled upon the agreement with the Department of Educational Policy and the Department for the Organization of Internship and Employment of RUDN students.

8. RESOURCES RECOMMENDED FOR INTERNSHIP

Main readings:

1. Бей-Биенко Г.Я. Общая энтомология: Учебник-СПб : «Проспект науки», - 2008.- 486
2. Защита растений от вредителей/ Под ред. Н. Н. Третьякова, В. В. Исаичева. Санкт-Петербург. -М. - Краснодар. - 2012.- 528с.
3. Карантин растений / Под ред. А.С.Васютина М., 2002 - 536с.
4. Перечень вредителей, возбудителей болезней растений, сорняков, имеющих карантинное значение для РФ.МСХ, 2003. -6с.
5. Биология карантинных вредных организмов (сорняки, вредители и болезни) [Электронный ресурс]: курс лекций / сост. О. Б. Котельникова. -Курск: изд-во КГСХА, 2008. -160с.
6. Фитосанитарный контроль и надзор в Орловской и Курской областях/ Под общ. ред. Е. Н. Дубровина. –Орел: ООО ПФ «Оперативная полиграфия», 2008.- 461с.

The training toolkit and guidelines for a student to do an internship, keep an internship diary and write an internship report:*

1. Safety regulations to do the internship (safety awareness briefing).
2. Machinery and principles of operation of technological production equipment used by students during their internship; process flow charts, regulations, etc. (if necessary).
3. Guidelines for keeping an internship diary and writing an internship report.

*The training toolkit and guidelines for the internship are placed on the internship page in the university telecommunication training and information system under the set procedure.

8. ASSESSMENT TOOLKIT AND GRADING SYSTEM* FOR EVALUATION OF STUDENTS' COMPETENCES LEVEL AS INTERNSHIP RESULTS

The assessment toolkit and the grading system* to evaluate the level of competences (competences in part) formation as the internship results are specified in the Appendix to the internship syllabus.

* The assessment toolkit and the grading system are formed on the basis of the requirements of the relevant local normative act of RUDN University (regulations / order).
