COURSE SYLLABUS

International Transport Logistics

(name of discipline/module)

Recommended by the Didactic Council for the Education Field of

38.04.01 Economics

(code and name of the direction of training/specialty)

The development of the discipline is carried out within the framework of the implementation of the main professional educational program of higher education:

International trade

(name (profile/specialization))

1. COURSE GOALS

The purpose of studying the discipline "International Transport Logistics" is to form systematic and practical knowledge in the field of international logistics, as well as the role of transport and logistics in ensuring international commodity distribution.

2. LEARNING OUTCOMES

Studying the discipline "International Transport Logistics" is aimed at the formation of the following competencies (part of the competencies) among students:

Table 2.1. The list of competencies formed by students during the development of the discipline (the results of mastering the discipline)

Competence code	Competence	Competence code
GC-4	Able to apply modern communication technologies in the state language of the Russian Federation and foreign language(s) for academic and professional interaction	GC-4.1. Chooses the style of business communication, depending on the language of communication, the purpose and conditions of the partnership
		GC-4.2. Adapts speech, communication style and sign language to situations of interaction
		GC-4.3. Searches for the necessary information to solve standard communicative tasks in Russian and foreign languages
		GC-4.4. Conducts business correspondence in Russian and foreign languages, taking into account the peculiarities of the style of official and unofficial letters and socio-cultural differences in the format of correspondence
		GC-4.5. Uses dialogue for cooperation in academic communication of communication, taking into account the personality of the interlocutors, their communicative and speech strategy and tactics, the degree of formality of the situation
		GC-4.6. Forms and argues its own assessment of the main ideas of the participants in the dialogue (discussion) in accordance with the needs of joint activities
GC-7	Capable of using digital technologies and methods of searching, processing, analyzing, storing and presenting information (in the professional field) in the digital economy and modern corporate information culture	GC-7.1. Searches for the necessary sources of information and data, perceives, analyzes, remembers and transmits information using digital means, as well as with the help of algorithms when working with data received from various sources in order to effectively use the information received to solve problems
		GC-7.2. Evaluates information, its reliability, builds logical conclusions on the basis of incoming information and data

Competence code	Competence	Competence code
SPC-4	Able to make economically and financially sound organizational and managerial decisions in professional activities and be responsible for them	SPC-4.1.Develops organizational and managerial decisions in professional activities SPC-4.2.Has the skills of reasoned persuasion in support of the proposed financial-economic and organizational-managerial decisions SPC-4.3Controls the results of the implementation of financial, economic, organizational and managerial decisions
SPC-5	Able to use modern information technologies and software tools in solving professional problems	SPC-5.1. Knows modern information technologies and software tools used in solving professional problems SPC-5.2. Able to choose the most effective ones among modern information technologies and software tools for solving professional problems SPC-5.3. Has full skills in solving standard tasks of professional activity using information technologies and software tools
PC-1	Able to conduct independent research in accordance with the developed program and on their basis to prepare analytical materials for the evaluation of activities in the field of economic policy and strategic decision-making at the micro and macro levels	PC-1.1. Able to present the results of an independent study in the form of an article or a report at scientific conferences
		PC-1.2. Capable of Conducting Analytical Studies to Evaluate Economic Policy Interventions
		PC-1.3. Able to make a forecast of the main socio-economic indicators of the enterprise, industry, region and economy as a whole
		PC-1.4. Able to make strategic decisions at the micro and macro levels on the basis of independent research
PC-2	Able to present the results of an independent study in the form of an article or a report at scientific conferences	PC-2.1. Able to conduct analytical studies to assess economic policy measures
		PC-2.2. Able to make a forecast of the main socio-economic indicators of the enterprise, industry, region and economy as a whole
		PC-2.3. Able to make strategic decisions at the micro and macro levels on the basis of independent research

3. COURSE IN HIGHER EDUCATION PROGRAMME STRUCTURE

The discipline "International Transport Logistics" refers to the part formed by the participants of the educational relations of block B1 of the Education Program.

Within the framework of the Education Program, students also master other disciplines and / or practices that contribute to the achievement of the planned results of the development of the discipline "International Logistics".

Table 3.1. List of Higher Education Program (me) components / disciplines that contribute to expected learning/training outcomes

Code	Competence	Previous disciplines/modules, practices*	Subsequent disciplines/modules, practices*
GC-4	Able to apply modern communication technologies in the state language of the Russian Federation and foreign language(s) for academic and professional interaction	International Labour Market and Migration Theory and Practice of International Business Communication International monetary and credit relations International trade Customs and tariff regulation Conjuncture of world markets for goods and services International statistical databases (advanced level) Legal regulation of economic and foreign economic activity International Finance	
GC-7	Capable of using digital technologies and methods of searching, processing, analyzing, storing and presenting information (in the professional field) in the digital economy and modern corporate information culture	International monetary and credit relations International trade Customs and tariff regulation Conjuncture of world markets for goods and services Organization of international procurement International statistical databases (advanced level) The EU in international trade World experience in the implementation of management information systems International Corporate Marketing Strategies Project management Currency regulation and currency control in foreign economic activity International activities of commercial banks Legal regulation of economic and foreign economic activity International Finance	
SPC-4	Able to make economically and financially sound organizational and managerial decisions in professional activities and be responsible for	Theory and Practice of International Business Communication Customs and tariff regulation Organization of international procurement Project management

5. COURSE MODULES AND CONTENTS

Table 5.1. The content of the discipline (module) by types of educational work

Course Modules and Contents	Modules and Topics (Units/Themes)	Type of educational work*
Section 1. International Transport Logistics: Basic Concepts and Categories	Topic 1. Definitions of logistics. Goals, objectives and functions.	LC
	Topic 2. Logistics and supply chain management concepts. Modern process of cargo delivery	LC
Section 2. Modern trends in the development of international transport logistics	Topic 3. International transport and logistics in the context of the concept of sustainable development. Greening international transport and logistics: the EU experience	LC
	Topic 4. Digitalization of international transport operations	SC
	Topic 5. Containerization of international trade. Types of containers	LC
Section 3. Classification and characterization of international transport operations	Topic 6. Intermediary operations in international transport logistics. Freight forwarding	LC
	Topic 7. Freight forwarding contract. Legal regulation of freight forwarding activities. FIATA	LC
	Topic 8. Logistics providers and their role in international transport logistics	SC
	Topic 9. Classification of international transport operations depending on the mode of transport used. Trunk modes of transport	LC
	Topic 10. Classification of international transport operations depending on the type of cargo transported. Classification and types of cargo	LC
	Topic 11. Classification of international transport operations depending on the type of transport documents. Types of transport documents	LC
Section 4. Material and technical base of international transport	Topic 12. Classification and types of vessels used in international water transport	LC
	Topic 13. Port infrastructure of world merchant shipping	SC
	Topic 14. Port infrastructure of Russia	SC
	Topic 15. Types of rolling stock used in rail and road transport	SC
Section 5. Legal framework for international transport by various modes of transport	Topic 16. General characteristics of the national transport legislation of Russia	SC
	Topic 17. Conventions and agreements governing international transport. Legal regulation of multimodal transport	SC
	Topic 18. Presumption of fault of the carrier. Limit of carrier's liability on different modes of transport	SC
Section 6. Basic terms of delivery of Incoterms 2020	Topic 19. Basic terms of delivery incoterms 2020: general obligations of the parties and the procedure for allocating costs	LC
	Topic 20. Transport characteristics of the basic conditions of delivery applied to various modes of transport	SC
Section 7. Procedure and	Topic 21. Features of the organization of cargo	LC

Course Modules and Contents	Modules and Topics (Units/Themes)	Type of educational work*
features of the organization of international transportation by various modes of transport	transportation by sea transport. Types of contract for the carriage of goods by sea in international traffic. Linear bill of lading and its types	
	Topic 22. Freight operations: freight market and chartering techniques. Charter agreement. Types of charters	SC
	Topic 23. Maritime Pricing: International Maritime Tariffs	SC
	Topic 24. Features of the organization of cargo transportation by rail. COTIF and SMGS systems. Rail freight pricing: international rail fares	SC
	Topic 25. Features of the organization of cargo transportation by road. TIR carnet (TIR Carnet): functions and purpose. Road Transport Pricing: International Road Freight Tariffs	SC
	Topic 26. Features of the organization of cargo transportation by air transport. Pricing on air transport: international air fares	SC
	Topic 27. Multimodal transportation. Container and piggyback messages	SC

* - is filled only in the **full-time** form of training: *LC* - lectures; *LR* - laboratory work; *SC* - seminar classes.

6. CLASSROOM EQUIPMENT AND TECHNOLOGY SUPPORT REQUIREMENTS
