**Federal State Autonomous Educational Institution of Higher Education  
«Peoples' Friendship University of Russia named after Patrice Lumumba»**

**FACULTY OF HUMANITIES AND SOCIAL SCIENCES**

educational division (faculty/institute/academy) as higher education programme developer

## **RESEARCH WORK SYLLABUS**

**Recommended by the Didactic Council for the Education Field of:**

41.04.05 International Relations

field of studies / speciality code and title

**The student's internship is implemented within the professional education programme  
of higher education:**

Peacekeeping, Peacebuilding and Conflict Resolution

higher education programme profile/specialisation title

## 1. INTERNSHIP GOAL(s)

The purpose of conducting "Research Work" is to consolidate in students the knowledge, skills and abilities acquired during the mastering of disciplines of professional training by focusing on the main directions of scientific research in the field of historical and political sciences, corresponding to the educational programme in the direction 41.04.05 "International Relations".

## 2. REQUIREMENTS FOR LEARNING OUTCOMES

The internship implementation is aimed at the development of the following competences (competences in part):

*Table 2.1. List of competences that students acquire during the internship*

Competence code	Competence descriptor	Competence formation indicators (within this course)
GC-1	Able to critically analyse problem situations on the basis of a systematic approach, develop a strategy of action	GC-1.1 Systematically analyses professional situations and demonstrates critical thinking skills; GC-1.2 Comprehensively analyses the source of information in terms of temporal and spatial conditions of its origin, objectivity and reliability; GC-1.3 Systematically analyses previously established approaches and explanations in science, identifying their strengths, weaknesses, explanatory power and limitations; GC-1.4 On the basis of the systematic approach builds its own strategy of scientific search and logic of scientific argumentation.
GC-2	Able to manage the project at all stages of its life cycle	GC-2.1 Defines the project goal and objectives, project implementation strategy, considering time and resource constraints; GC-2.2 Determines alternative options for solving the assigned tasks, considering possible management risks; GC-2.3 Defines the expected results of solving the set tasks; GC-2.4 Formulates reporting documentation on the results of project development and implementation
GC-4	Able to apply modern communicative technologies, including in foreign language(s), for academic and professional interaction	GC-4.1 Uses various forms and types of oral and written communication in Russian, native and foreign language(s) at a professional level; GC-4.2 Uses adequate linguistic means to achieve professional goals in Russian, native and foreign language(s); GC-4.3 Uses modern communication technologies for professional purposes;
GC-5	Able to analyse and consider the diversity of cultures in the process of intercultural interaction	GC-5.1 Understands the peculiarities of development and socio-cultural differences of different countries and peoples considering their historical past and is able to take these peculiarities into account in the course of intercultural interaction; GC-5.2 Constructively interacts with representatives of different countries and peoples in solving professional tasks;

<b>Competence code</b>	<b>Competence descriptor</b>	<b>Competence formation indicators (within this course)</b>
		GC-5.3 Demonstrates a deep understanding of the specifics of Russia's traditions, history and role in the world-historical process and is able to explain these specifics in a professional and reasoned manner in the course of intercultural communication
GC-7	Able to: search for the necessary sources of information and data, perceive, analyze, remember and transfer information using digital means, as well as with the help of algorithms when working with data received from various sources in order to effectively use the obtained information for problem solving; evaluate information, its reliability, build logical inferences on the basis of incoming information and data.	GC-7.1 Able to effectively search and select relevant sources of information using digital tools and data processing algorithms; GC-7.2 Possesses skills in analysing, interpreting and assessing the validity of information and communicating logically constructed conclusions using digital technologies.
GPC-1	Able to build professional communication in the state language of the Russian Federation and foreign language(s) on the profile of activity in a multicultural environment on the basis of application of various communicative technologies, considering the specifics of business and spiritual culture of Russia and foreign countries	GPC-1.1 Build communication with partners based on the goals and situation of communication, identifying and responding appropriately to cultural, linguistic and other characteristics affecting professional communication and dialogue; GPC-1.2 Use communicative meditative technologies considering the specifics of business and spiritual culture of Russia and foreign countries;
GPC-2	Able to search for and apply promising information and communication technologies and software tools for complex setting and solving problems of professional activity.	GPC-2.1 Apply modern technologies of searching, processing and analysing information to interpret and forecast the development of international political processes; GPC-2.2 Use specialised databases and software tools to promptly search for information required to solve professional tasks; GPC-2.3 Adequately assess the information received to identify information gaps and identify attempts of propaganda and manipulative influence, considering the requirements of information security; GPC-2.4 Conduct quantification of qualitative data and meaningful interpretation of quantitative data.
GPC-3	Able to assess, model and forecast global,	GPC-3.1 Use theoretical empirical methods to assess international political processes at various levels, master

<b>Competence code</b>	<b>Competence descriptor</b>	<b>Competence formation indicators (within this course)</b>
	macroregional, national-state, regional and local political-cultural, socio-economic and socio-political processes based on the application of methods of theoretical and empirical research and applied analysis.	the positivist and hermeneutic methodology of comprehending political reality; GPC-3.2 Forecast the development (including on the basis of scenarios) of the situation within the framework of solving the main international problems affecting, first of all, the interests of the Russian Federation.
GPC-4	Able to conduct scientific research in the field of activity, including in interdisciplinary areas, independently formulate scientific hypotheses and innovative ideas, verify their validity.	GPC-4.1 Conduct scientific research in interdisciplinary areas, including setting goals and objectives, positioning the selected problem in the available literature on the topic, selecting research methods, determining the scientific novelty of the researched problems, confirming the validity of scientific hypotheses, formulating their own conclusions and recommendations; GPC-4.2 Analyse international and political-economic problems and processes while respecting the principle of scientific objectivity.
GPC-5	Able to build a strategy to promote publications on the profile of activity in the mass media on the basis of basic principles of media management.	GPC-5.1 Independently prepare professionally-oriented texts of different genre and style (article, analytical note, information-analytical note, review, programme document, abstract, theses of the report, press release, etc.); GPC-5.3 Form and promote the required image of political phenomena and processes through a series of publications of various genres in different types of media; GPC-5.4 Evaluate the perception of the image of political phenomena and processes formed in the media.
GPC-7	Able to independently build strategies for presenting the results of his/her professional activity, including in a public format, based on the selection of appropriate information and communication technologies and channels of information dissemination.	GPC-7.1 Build strategies for presenting the results of professional activities, considering their specificity and the characteristics of the target audience; GPC-7.2 Construct persuasive arguments to achieve the objectives of presenting professional performance; GPC-7.3 Select optimal information and communication technologies and channels of information dissemination. Build a feedback system with target audiences to improve the effectiveness of communication.
GPC-10	Able to master the tools of working with large arrays of structured and unstructured information, use modern digital methods of processing, analysis, interpretation and visualisation of data in order to solve the tasks of	GPC-10.1 Able to use digital tools and methods of processing large data sets to solve professional problems; GPC-10.2 Possesses data visualisation skills using modern digital tools and is able to interpret results to solve research and practical problems.

Competence code	Competence descriptor	Competence formation indicators (within this course)
	professional and research activity in the field of international relations.	
PC-1	Able to independently develop and design analytical materials.	PC-1.1 Evaluate international political processes, drawing informed conclusions; PC-1.2 Develop forecasts on the development of global and regional trends for the long term; PC-1.3 Develop corporate development strategies in areas of professional competence using international political analysis skills; PC-1.4 Conduct and coordinate analytical work in the field of international contacts with the development of expert opinions and practical recommendations.

### 3. INTERNSHIP IN HIGHER EDUCATION PROGRAMME STRUCTURE

The internship refers to the core component of (B2) block of the higher educational programme curriculum.

Within the higher education programme students also master other disciplines (modules) and / or internships that contribute to the achievement of the expected learning outcomes as results of the internship.

*Table 3.1. The list of the higher education programme components that contribute to the achievement of the expected learning outcomes as the internship results.*

Competence code	Competence descriptor	Previous courses/modules, internships*	Subsequent courses/modules, internships*
GC-1	Able to critically analyse problem situations on the basis of a systematic approach, develop a strategy of action	<ul style="list-style-type: none"> <li>○ Megatrends and Global Affairs</li> <li>○ Regional Subsystems of International Relation in the XXI-st century</li> <li>○ Contemporary Foreign Policy of Russia and International Conflicts</li> <li>○ International Conflicts</li> <li>○ Interventions in International Relations</li> <li>○ Global Security</li> <li>○ Professional Ethics in International Relations</li> <li>○ Theory and Practice of Diplomacy</li> <li>○ International Terrorism</li> <li>○ UN Peacekeeping Activity</li> <li>○ Conflict Resolution and Peacekeeping</li> <li>○ International</li> </ul>	<ul style="list-style-type: none"> <li>○ Master's Thesis Preparation</li> </ul>

\* To be filled in according with the competence matrix of the higher education programme.

#### 4. INTERNSHIP WORKLOAD

The total workload of the internship is 6 credits (216 academic hours).

#### 5. INTERNSHIP CONTENTS

*Table 5.1. Internship contents\**

Modules	Contents (topics, types of practical activities)	Workload, academic hours
Module 1. Scientific research.	Scientific knowledge, its essence, features and necessity of acquisition. Scientific research, its essence and features. Types and forms of science, its role and features. Science as a complex multidimensional and multilevel phenomenon, as an object of special scientific study. Scientific problem. Characteristics and content of the stages of research work. Language of science. Methodological rules of introduction and application of terms in scientific research.	20
Module 2. Research Methodology.	Concepts of method and methodology of scientific research. Existing levels of cognition in the methodology of scientific research. The essence of theoretical and empirical methods of scientific cognition. The essence, role, composition and content of general scientific methods of cognition. The essence, content and role of specific scientific (private) methods of cognition.	20
Module 3. Preparatory stage of the research work.	Methodological requirements for the title of a scientific title work. Methodological requirements for setting the goal of scientific work. Relevance Research. Novelty of research. Methodological requirements for the content of scientific work. Methodological requirements for the result of scientific work. Choice of method (technique) of	20

<b>Modules</b>	<b>Contents (topics, types of practical activities)</b>	<b>Workload, academic hours</b>
	research. Description of the research process. Discussion of the research results. The need for approbation of scientific results. Planning of research work	
Module 4. Basic methods of research information retrieval for international research.	Main sources of scientific information. Organisation of reference and information activity. Methods of work with catalogues and card catalogues. Universal Decimal Classification (UDC). Library and bibliographic classification (LBC). Bibliographic indexes. Sequence of search for documentary sources of information. State rubricator of scientific and technical information (GRNTI). Internet resources. Peculiarities of using Internet resources. Working with sources, reading techniques, note-taking, making a book plan. Types of publications.	20
Module 5. Methodology of work on the research manuscript, features of preparation and formalities.	Composition of a scientific work. Rubrication of the text of the scientific work. Narrative and descriptive texts. Procedures for dividing materials into chapters and paragraphs. Methods writing a text. Language and style of scientific written text. Formalisation of quotations. The use of numerical values in scientific text. Abbreviations of words. Tabular form organisation of the material. Graphic way of presenting illustrative material. Formalisation of reference and bibliographic apparatus. Requirements for the printed original manuscript. Preparation of illustrative material. Peculiarities of preparing a report on research work. Features of the procedures of preparation, design, defence of master's qualification work.	20
Module 6. Methodology for preparing the report and presentations.	Features of the report as a type of communication of scientific work. The art of speech. Presentation as a convenient and effective way. General principles of presentation construction. Determination of the necessary number of slides. Content and design of presentation slides.	20
Module 7. Methodology for preparing grant applications.	Science programmes as a form of educational, scientific and cultural policy. Scientific foundations, their characteristics. Foreign and domestic foundations supporting scientific research projects. Expertise of scientific projects. Rules of application submission. Types of grants. Justification of a research project. Techniques of control of project implementation. Estimates and financial calculations of the cost of work. Formalisation of applications. Management of research projects. Planning, formulation of tasks to performers, decision-making in crisis situations,	20

Modules	Contents (topics, types of practical activities)	Workload, academic hours
	control, analysis of situations, analysis of results.	
Writing an internship report		36
Preparing for defence and defending the internship report		40
<b>TOTAL:</b>		<b>216</b>

\* The contents of internship through modules and types of practical activities shall be FULLY reflected in the student's internship report.

## 6. INTERNSHIP EQUIPMENT AND TECHNOLOGY SUPPORT REQUIREMENTS

Specially equipped rooms complying with the current sanitary and fire safety standards, as well as safety requirements at the workplace (Research institutions (Far East Institute of the Russian Academy of Sciences, Institute of Oriental Studies of the Russian Academy of Sciences, IMEMO, Institute of CIS countries, Gorchakov Public Diplomacy Support Foundation, National Committee for BRICS Research, ASEAN Centre of MGIMO, RISI, RUDN, etc.)).

## 7. INTERNSHIP LOCATION AND TIMELINE

"Research work" can be carried out both in PFUR structural subdivisions or in Moscow organisations (stationary) and at the bases outside Moscow (field work).

The internship at the base of an external organisation (outside PFUR) is carried out on the basis of a relevant agreement, which specifies the terms, place and conditions of the internship at the base organisation.

The terms of the internship correspond to the period specified in the academic calendar of the programme of study. The dates of the internship can be adjusted in coordination with the Department of Educational Policy and the Department of Organisation of Internships and Student Employment at PFUR.

## 8. RESOURCES RECOMMENDED FOR INTERNSHIP

### *Main readings:*
